PROJECTS

H?KE, April 2016 to Present - <http://hike-portland.herokuapp.com>

- Designed the interface for the application that utilized three different APIs for weather, hike trails, and google maps within Portland. Technologies used: HTML, CSS, Javascript, JQuery, Ember, Sass, Bourbon, and Neat.

Crescendo Clothing, March 2016 - <http://crescendo-clothing.herokuapp.com/>

- Designed the interface for e-commerce website where users could sign-up and purchase articles of clothing receiving e-mail notifications. Technologies used: HTML, CSS, Sass, Materialize, and PHP.

Beyond the Basics, February 2016 - <http://www.swagner23q.github.io/beyondBasics>

- Final review of CSS where I designed and created a replica of the Arctic Wild website using different assets. Key CSS concepts included were flex-box and hover animations with some media queries. Technologies used: HTML, CSS, and Sass.
