PROJECTS

H?KE, April 2016 to Present - http://hike-portland.herokuapp.com
- Designed the interface for the application that utilized three different APIs for weather, hike trails, and google maps within Portland. Technologies used: HTML, CSS, Javascript, Jquery, Ember, Sass, Bourbon, and Neat.

Crescendo Clothing, March 2016 - http://crescendo-clothing.herokuapp.com/
- Designed the interface for e-commerce website where users could sign-up and purchase articles of clothing receiving e-mail notifications. Technologies used: HTML, CSS, Sass, Materialize, and PHP.

Beyond the Basics, February 2016 - http://www.swagner23q.gituhub.io/beyondBasics
- In final review of CSS, designed and created a replica of the Arctic Wild website using different assets. Key CSS concepts included flex-box and hover animations with some media queries. Technologies used: HTML, CSS, and Sass.
